20 SV1

Performance, reliability and professional-grade cleaning power – delivered by our all-new range of commercial vacuum cleaners.

Designed from the ground up for professionals who expect more, this next-generation line-up features robust wet and dry vacuums, advanced water-filtration models for enhanced air quality and versatile tub vacuums that bring agility and strength to everyday tasks.

Every unit is engineered with long-lasting components, high-efficiency motors and rugged construction to deliver exceptional durability, maximum suction performance and an extended service life.

Sprint by Genius[®], Engineered for effortless versatility.

Whether you're running a commercial cleaning operation, maintaining high-traffic hospitality environments, or managing the demanding needs of an industrial facility, our vacuums are engineered to perform with unwavering consistency. They deliver the high-quality results your business relies on, day after day, shift after shift.

Every model in this range combines intuitive controls with simplified maintenance features, ensuring your team can stay focused on productivity rather than troubleshooting.

With performance you can trust and reliability that stands up to real world demands, this range empowers your team to work smarter, faster and more effectively, no matter the challenge.

TV1

Engineered for professional use

The TV1 is a professional-grade dry vacuum, designed to deliver exceptional cleaning performance in demanding environments.

Features & Benefits

Versatile design

Perfect for large areas such as hotels, offices, schools and commercial facilities, it combines industrial power with everyday convenience, making it equally suitable for home use.

Built to last

The TV1 vacuum is durable and reliable, ensuring consistent performance even during intensive, long-term operation. Its compact design and lightweight construction make it easy to manoeuvre, allowing users to move effortlessly around furniture and between rooms.

Powerful and practical

Whether used by professional cleaning staff or homeowners who value high-quality tools, the TV1 vacuum offers a perfect balance of power, practicality and ease of use.

With an efficient suction system, sturdy build and ergonomic handling make it an ideal choice for anyone seeking a dependable and versatile vacuum that combines professional performance with user-friendly design.

Included equipment:

- Small nozzle
- Brush nozzle
- Crevice nozzle
- 2.8m suction hose
- Telescopic wand
- 2 paper bags

Ametec ECO motor produces very large suction power with low energy consumption

Compact build & lightweight

TV2

Built for demanding environments

The TV2 vacuum delivers professional-grade cleaning performance in a compact and easy-to-handle design. Built for demanding environments such as hotels, offices and commercial facilities, it combines power, durability and convenience to ensure effortless cleaning every day.

Features & Benefits

Powerful cleaning efficiency

With its large 10 litre dust bag capacity, the TV2 vacuum allows for longer cleaning sessions without interruption. The manual cord rewinder makes setup and storage quick and hassle-free, keeping everything neatly organised after use. Powered by a long-life, high-efficiency motor, this vacuum offers strong and consistent suction, guaranteeing deep and thorough cleaning results on all types of surfaces.

Compact and robust

Crafted with a shockproof polypropylene tank, the TV2 vacuum is built to last, resistant to impact, wear and the demands of continuous professional use.

Exceptional performance

Combining industrial reliability with user-friendly design, the TV2 vacuum is the perfect choice for anyone seeking a powerful, dependable and efficient vacuum for professional or home use.

Included equipment:

- Small nozzle
- Brush nozzle
- Crevice nozzle
- 2.8m suction hose
- Telescopic wand
- 2 paper bags

TV3

Consistent cleaning results

The TV3 is a professional, high-performance bagged vacuum cleaner designed specifically for dry vacuuming across large areas. It delivers reliable suction and consistent cleaning results, making it ideal for commercial and industrial environments such as offices, hotels, schools and retail spaces.

Features & Benefits

Durable build

The vacuum features a heavy-duty, robust body and shockproof metal tank designed for long life and reliable operation.

Ease of use

Equipped with rubber-tyred wheels for floor protection, a vacuum level control on the hose handle and the ability to work in an upright position (useful for cleaning stairs). The cord is securely mounted on a semi-automatic, manual rewind system, enabling quick, safe and convenient cable management for effortless setup at the start of work and efficient storage when cleaning is complete.

Large area cleaning

The 15m power cord and 19m working range make it ideal for extensive areas such as offices and hotels, reducing the need to frequently change power outlets.

Included equipment:

- Small nozzle
- Brush nozzle
- Crevice nozzle
- 2.8m suction hose
- Telescopic wand
- 2 paper bags

HV1

Designed for maximum convenience

Experience the ultimate in portable cleaning with the HV1, a compact, ultra-lightweight hand held vacuum designed for everyday cleaning where space is tight. With high-efficiency cyclonic suction, dual-mode operation and HEPA H13 filtration.

Features & Benefits

Productive cleaning

Enjoy extended cleaning sessions without interruption. The long-lasting battery provides up to 36 minutes of continuous power, more than enough to tackle multiple rooms, quick clean-ups, or daily maintenance. This ensures you can complete most tasks on a single charge.

Tailored performance

Switch effortlessly between high and low power settings to match the cleaning job. Use low mode for everyday debris on hard floors, and high mode for deep cleaning carpets, upholstery or stubborn dirt.

Filtration system

Designed with a high-efficiency filtration system, the vacuum captures fine particles, dust and common household allergens.

Cyclonic bagless technology

The advanced cyclonic system separates dirt from the airflow, maintaining strong suction throughout your cleaning session.

Convenient charging

A dedicated charging and storage dock keeps the vacuum conveniently stored and always ready to use. Simply place the unit on the dock when you're done and it automatically recharges while staying neatly organised.

Included equipment:

- Long crevice tool
- 2-in-1 upholstery and floor tool
- Aluminium extension tube

HV1 Specifications

SV1

Re-imagine everyday cleaning

The SV1 is an ultra-lightweight, portable stick vacuum designed for ultimate convenience without compromising on performance. Engineered for effortless versatility, the SV1 glides with ease, making quick clean-ups and deep-clean sessions equally seamless.

Features & Benefits

Advanced motor design

At its core is a high-efficiency brushless motor that delivers strong, consistent suction while operating quietly and efficiently. Paired with advanced HEPA filtration, the SV1 captures fine dust, allergens and airborne particles, helping create a cleaner and healthier environment.

Power and precision

Choose from three optimised suction modes, to match any cleaning task. From delicate surfaces to stubborn debris in carpets, the SV1 adapts with precision and power.

High-capacity endurance

Its extended runtime of up to 85 minutes ensures you can clean multiple rooms on a single charge, while intuitive LED touch controls keep everything at your fingertips.

A complete set of smart, multi-purpose attachments adds even more capability, allowing you to reach tight corners, upholstered furniture, high shelves and more. Every detail of the SV1 has been crafted to integrate smart design with deep-cleaning performance, delivering a vacuum that's as efficient as it is enjoyable to use.

Included equipment:

- 2-in-1 brush
- Crevice nozzle with light
- Upholstery tool
