Revive

# Revive Genius®

Smart chemistry.  
Cleaner results.  
One trusted brand.

High-performance  
cleaning, powered  
by plants.

## Helping you to maintain cleaner, healthier spaces.

Engineered for professional performance, Revive uses high-performance plant-based surfactants to deliver consistent, effective cleaning results.

Revive by Genius® is our curated range of high-performance cleaning chemicals, designed to meet the exacting demands of today's commercial environments. From care homes to hotels, schools to stadiums, Revive delivers professional results with products that are easy to use, efficient and effective.

With dedicated solutions across housekeeping, floorcare, laundry, kitchens, bars and healthcare, Revive helps you standardise your cleaning process, reduce product complexity and improve operational outcomes, all while supporting compliance and enhancing customer satisfaction.

This document showcases the breadth of the Revive range and maps it by sector, so you can quickly identify which products are most suited to your setting. Whether you run a busy accommodation site, a healthcare facility, or a retail outlet, Revive gives your teams the tools they need to deliver consistently high standards, every day.

# Revive Chemistry Explained

Professional cleaning works best when the chemistry matches the task.

Revive products are designed around performance first – choosing the right chemistry, at the right strength, for the right job.

## How Revive is designed

### Start with the aim:

What problem needs solving – grease, limescale, infection control, daily maintenance?

### Understand the application:

Surface type, environment, frequency of use and staff safety.

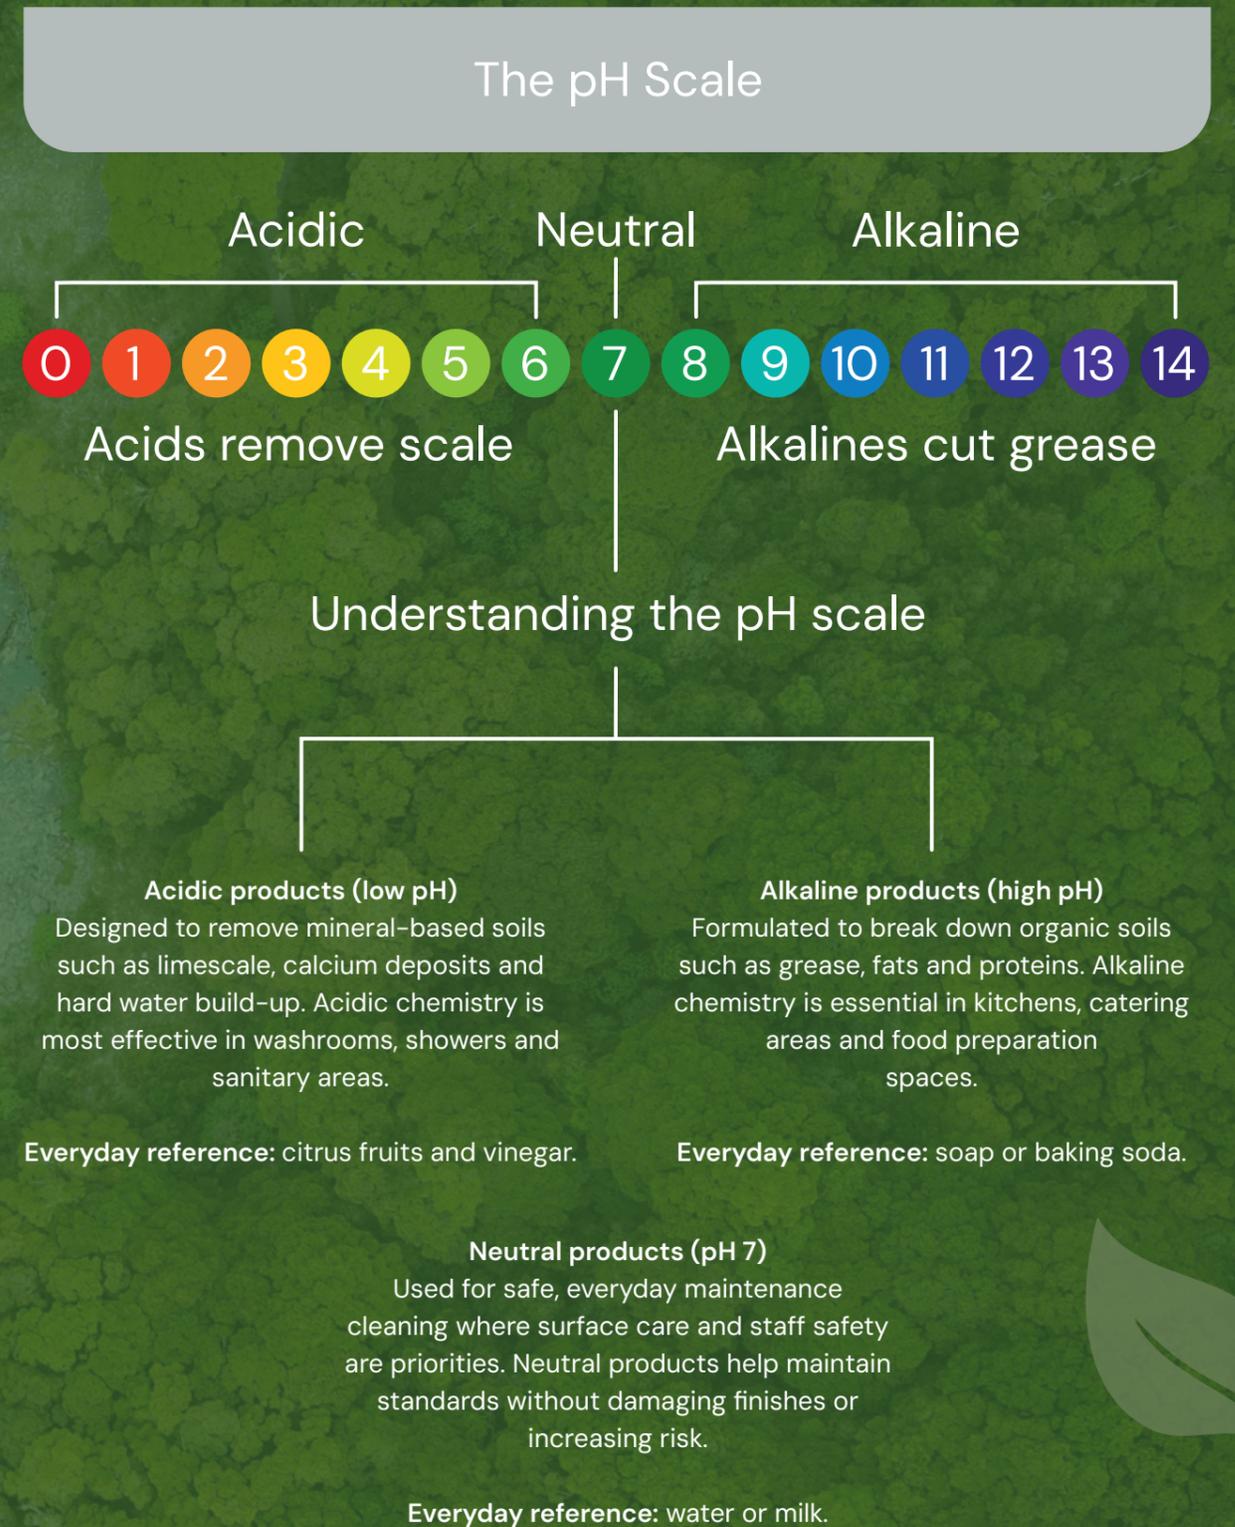

### Apply the correct chemistry:

Matching pH and formulation to deliver reliable, repeatable results.

### High performance, used responsibly

Revive products contain plant-based or naturally derived ingredients where they deliver the required performance. Where they cannot, we do not compromise effectiveness, safety or compliance. Revive products are concentrated and designed to work effectively at lower use levels.

Sustainability with real impact, lower dosing, fewer deliveries and reduced transport volumes help reduce overall CO emissions. Sustainability is not just about what a product is made from – it is about how efficiently it performs in real-world use.

The right chemistry • At the right strength  
 For the right job

# The Range

## Accommodation – AC

- AC1 – Multi-Surface Cleaner
- AC2 – Multi-Surface Bactericide
- AC3 – Furniture Polish
- AC4 – Air Care
- AC5 – All Surface Odour Neutraliser
- AC6 – Cream Cleaner
- AC7 – Stainless Steel Cleaner
- AC8 – Drain Unblocker

## Washroom – WR

- WR1 – Toilet Cleaner (Soft water)
- WR2 – Toilet Cleaner (Hard water)
- WR3 – Multi-Surface Washroom Cleaner
- WR4 – Descaler
- WR5 – Pine Disinfectant

WR6 – Floral Disinfectant

WR7 – Thick Bleach

WR8 – Urinal Blocks

WR9 – Spray and Wipe with Bleach

## Laundry – LD

- LD1 – Laundry Detergent
- LD2 – Fabric Softener
- LD3 – Laundry Destainer
- LD4 – Laundry Disinfectant

## Food Services – FS

- FS1 – Beer Line Cleaner
- FS2 – Dishwasher Detergent
- FS3 – Glass Renovator
- FS4 – Bar and Table Cleaner
- FS5 – Washing up Liquid
- FS6 – General Degreaser
- FS7 – Surface Disinfectant

FS8 – Heavy Duty Oven Cleaner

FS9 – Dishwasher Rinse Aid

FS10 – Auto Dose Glass Wash

FS11 – Auto Dose Glass Rinse

FS12 – Dishwasher Tablets

FS13 – Dishwasher Salt

FS14 – Tannin and Stain Remover

FS15 – Enzyme Drain Cleaner

## Floorcare – FL

- FL1 – Floor Polish Stripper
- FL2 – Defoamer
- FL3 – Extra Shine Floor Polish
