Max F3

F3

The Max F3 is a professional battery-powered scrubber dryer designed to deliver powerful and efficient hard floor cleaning in commercial environments. Combining compact design with advanced flexibility, the Max F3 scrubs and dries floors in a single pass, leaving surfaces clean, dry and safe to walk on.

Features & Benefits

Innovative flexy joint technology

At the heart of the Max F3 is the patented flexy joint, which allows the machine to tilt and rotate up to 90° on both sides. This unique system makes it easy to clean under furniture, desks and tables where traditional scrubber dryers cannot reach, maintaining full cleaning performance.

Scrub and dry in one pass

The Max F3 combines powerful scrubbing action with an efficient vacuum system that immediately removes dirty water from the floor. Dual squeegee blades collect moisture from both directions, leaving the surface clean and dry in a single movement.

Compact, lightweight and easy to use

Despite its professional performance, it is designed for operator comfort and ease of use. The lightweight construction and ergonomic handle make it simple to manoeuvre in confined spaces.

Ideal for offices, healthcare facilities, hospitality venues and retail environments, this versatile machine provides excellent performance in areas where space is limited and manoeuvrability is essential.

MAX F3 Specifications

Weight with battery	10.1kg
Working width - vacuum	365mm
Working width - brush	335mm
Working capacity (approx)	600m²/h
Solution tank	2.5L
Recovery tank	2.5L
Working time (full tank)	18min
Brush rotation speed	1400rpm
Voltage	36DC
Input power	300W
Suction motor	300W
Battery charger	220-240V
L-ion battery	36V
Runtime	45min
Recharging time	90min
Water dosing	Pump
Noise level	70db
Dimensions	390 X 430 X 1150mm

*Dimensions L | W | H
