

SOAP₂

making waves in saving the planet

ABOUT OUR SOAPS

Single use plastics?
Not on our watch!

Soap20 is an innovative soap solution made of biodegradable materials. The soap powder is encapsulated in water soluble film, which once added to water completely dissolves to form the end soapy product!

The powerful soluble soap sachets are formulated to clean and moisturise your hands. Fragranced with beautiful natural pomegranate and cranberry or pink grapefruit scents and are sealed in 100% recyclable packaging.

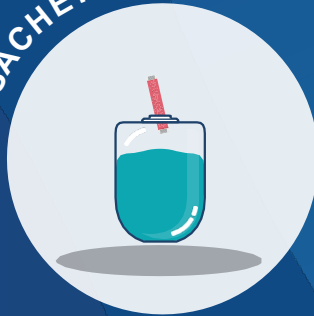

HOW TO USE OUR SOAPS

WATER

1. Fill the bottle with water to the line

SACHET

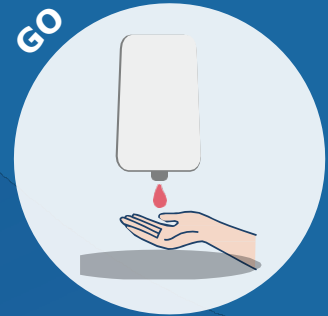

2. Drop the soap sachet into water

SHAKE

3. Shake the container. Wait 30 seconds

GO

4. Ready to go!

ECO-FRIENDLY GOALS

We believe that washing your hands and body shouldn't damage the earth, so we are helping companies adopt a green soap solution. We are doing this by growing a global presence of our innovative soap solution and significantly reducing the existence of single use plastics found in traditional soaps. Join us on our mission!

8 MILLION TONNES

One million plastic bottles are sold globally every single minute and there are over 8 million tonnes of plastic in our oceans.

Porcelain white dispenser

MAKE THE CHANGE

Soap20 aims to prevent any further plastic pollution generated by the soap industry...keep reading to find out just how we can do this.
