Max **SW4**

SW4

The SW4 walk-behind sweeper is the ideal solution for light industrial and commercial cleaning, combining compact dimensions with outstanding sweeping performance.

Designed for maximum manoeuvrability, it operates effortlessly in tight spaces, narrow aisles and cluttered environments, delivering professional results wherever precision is required.

Features & Benefits

Advanced dust control for safer cleaning

Equipped with a raised filter positioned above the cyclonic chamber, the SW4 features an advanced "dirt-in-bag" collection system that ensures superior dust retention. This innovative design captures even the finest powders without releasing them back into the environment, significantly improving air quality during operation and disposal.

Longer filter life, lower maintenance

By preventing premature filter clogging, the optimised airflow system extends filter life and reduces maintenance downtime. This means lower operating costs and consistent performance over time, ideal for facilities that demand efficiency and reliability.

Gentle yet effective on every surface

The adjustable brush pressure system allows operators to customise the sweeping action according to the surface being cleaned. From hard industrial floors to more delicate areas such as fitted carpets, the SW4 delivers thorough cleaning while protecting floor finishes and minimising wear.

SW4 Specifications

Hourly efficiency	3600m²/h
Working width / central brush	500mm
Working width / 1 side brush	750mm
Working width / 2 side brushes	900mm
Runtime	2.5hr - 3hr
Hopper capacity	45L
Waste collection (plastic bag)	Yes
Filter surface	3m²
Electric filter shaker	12V
Motor power & supply	0.6KW/12V
RPM	3000
Traction	Mechanical
Machine dimensions*	1440 X 730 X 1020mm
Empty weight	95kg

*Dimensions L | W | H

45L 90cm
